01 · COMPANY OVERVIEW

About AMJ QUANTIX

> AI-driven trading and investment company leveraging artificial intelligence, advanced market analytics, and automated trading technologies in global financial markets.

AMJ QUANTIX has an established market presence and a growing community of clients and investors. We aim to deliver technology-driven trading solutions and investment-related services through intelligent systems, automated strategies, and a client-focused digital experience.

Our business philosophy is built around innovation, transparency, technological advancement, and responsible market participation. We continuously explore new opportunities in financial technology to improve trading efficiency, market analysis, and the overall investor experience.

OUR VISION

To become a globally recognised AI-powered trading and investment technology company, providing innovative financial solutions and intelligent trading experiences across international markets.

OUR MISSION

To combine artificial intelligence, financial market expertise, and advanced automation to develop accessible, technology-driven trading solutions while maintaining transparency, operational discipline, and responsible risk management.

Our Core Values

Innovation

AI-powered financial technologies.

Transparency

Clear information on services, costs & risks.

Technology

Automation & intelligent market analysis.

Trust

Long-term responsible business practices.

Security

Secure systems & operational controls.

Client Experience

Accessible services & responsive support.

Artificial Intelligence Meets Financial Markets

AI-assisted trading technology designed to analyse market information, identify potential trading opportunities, and support automated trading workflows.

1 · AI Market Analysis

- Analyse market price movements
- Monitor technical indicators & trends
- Process market data & volatility
- Identify potential opportunities

2 · Automated Trading Systems

- Rule-based automated strategies
- Configurable trading parameters
- Automated order workflows
- Strategy monitoring & controls

3 · Intelligent Trading Signals

- AI-assisted market signals
- Technical analysis & indicators
- Entry & exit level analysis
- Market alerts & notifications

4 · Risk Management Technology

- Position & exposure monitoring
- Configurable trading limits
- Drawdown monitoring
- Risk alerts & operational controls

5 · Performance Monitoring

- Trading activity reports
- Strategy performance analysis
- Historical transaction records
- Account-level reporting

Our Technology Philosophy — We believe AI can improve how market information is processed and how trading strategies are monitored. However, **AI cannot eliminate financial market risks or guarantee trading profits.** All automated strategies require appropriate testing, monitoring, and risk controls.

Investment and Trading Solutions

AI-enabled trading technology and investment-related services across multiple financial asset categories.

Forex Market

- Foreign exchange analysis
- Major & minor pair monitoring
- Technical market analysis
- Strategy development
- Access via authorised arrangements

Crypto Spot Market

- Cryptocurrency analysis
- Digital asset price monitoring
- Spot trading technology
- Trend & volatility analysis
- Approved liquidity providers

Futures & Derivatives

- Futures market analysis
- Derivatives monitoring
- Automated strategy development
- Position & margin monitoring
- Risk & liquidation information

Availability of specific financial instruments depends on the relevant legal permissions, service-provider agreements, and operational readiness.

Investor-Focused Services

- Digital account access
- Investment-related information
- Trading activity monitoring
- Market updates & notifications
- Customer support
- Transaction & account information

Building Long-Term Relationships

> AMJ QUANTIX values the relationships it has developed with its clients and investors — built through technology, accessible services, transparent communication, and continuous improvement.

Our Client Commitment

- Professional customer support
- Clear communication about services & risks
- Accessible digital account information
- Continuous technology improvements
- Responsible handling of client information
- Focus on long-term client relationships

Client Experience

We aim to make technology-driven trading services more accessible through a connected digital experience.

Our long-term objective is to strengthen client engagement through improved digital tools, account services, market information, and responsive support.

A Connected Financial Technology Ecosystem

> A strategic vision to develop an integrated digital platform connecting AI-powered trading technology, market information, account services, and client management.

Website Platform

- Corporate website
- Secure client registration & login
- Client dashboard
- Market monitoring tools
- Trading interface
- Account management & transaction history

Android & iOS Applications

- Secure mobile access
- Account overview
- Market monitoring
- Trading notifications
- Portfolio information
- Order & position management

Technology Foundation

TECHNOLOGY	PURPOSE
Laravel	Core business and account management
Next.js	Website and web trading interface
Go	High-performance backend services
AI / ML	Intelligent market analysis
APIs	External market and liquidity connectivity
Cloud Infrastructure	Scalable digital operations

Future Platform Direction — Our long-term roadmap includes a proprietary web-based trading environment connected to external liquidity providers, covering Forex, Cryptocurrency Spot, and Cryptocurrency Futures. This brokerage platform is a **planned expansion** and should only be presented as operational after the relevant agreements, permissions, and launch requirements are fulfilled.

Responsible Technology and Market Participation

> Financial markets involve uncertainty and trading activities carry financial risks. Our technology and operational direction places importance on security, risk monitoring, and responsible communication.

Security Priorities

- Secure account authentication
- Access control & permissions
- Data protection
- Activity monitoring
- System backups & security testing
- Incident response procedures

Risk Management Priorities

- Trading exposure monitoring
- Automated risk alerts
- Configurable trading limits
- Strategy performance monitoring
- Operational risk management
- Clear client risk disclosures

Regulatory Commitment

Financial services are subject to different regulatory requirements in different jurisdictions. AMJ QUANTIX aims to ensure that its services, business structure, and market activities are appropriately reviewed against applicable legal and regulatory requirements.

The company should publish verified legal entity, registration, and licence information only where applicable and supported by official documentation.

07 · OUR STRATEGIC DIRECTION

The Future of AI-Powered Trading

> AMJ QUANTIX aims to expand its technology capabilities and strengthen its position in the financial technology industry.

01 Advancing AI-powered trading technologies

02 Improving automated trading systems

03 Expanding financial market analysis capabilities

04 Developing a proprietary web-based trading platform

05 Launching Android and iOS digital experiences

06 Evaluating international liquidity and technology partnerships

07 Improving client services and operational transparency

08 Expanding into additional markets where legally permitted

Our long-term objective is to build a connected financial technology ecosystem that brings **AI-assisted trading**, **market intelligence**, and **digital financial services** together.
